

## Call for Industry Abstracts for Presentations

### ORGANIZERS

#### General Co-Chairs

Salvo Baglio

University of Catania, Italy  
salvatore.baglio@unict.it

Steve Karlovic

CDI Engineering, USA  
steve.karlovic@cdicorp.com

#### Technical Program Co-Chairs

Sergio Rapuano

Università del Sannio, Italy

George Xiao

Information and Communication  
Technology, National Research Council,  
Canada

Chi-Hung Hwang

Instrument Technology Research Center,  
NARLabs, Taiwan

I<sup>2</sup>MTC 2018 conference spans research, development and applications in the field of instrumentation and measurement science and technology. To enhance industry engagement and increase exchange between industry members, as well as between industry and academic members, an Industry Day Special Event is being organized at I<sup>2</sup>MTC 2018.

Industry Day will focus on all aspects of instrumentation and measurement technologies, methods, and applications achieved by our industry colleagues, giving an opportunity to the I&M industry to present to their colleagues their new technologies, new applications, or even new challenges. We anticipate strong participation from those working in oil and gas, biomedical, aerospace and defense, as well as academia, though participation is not limited to these industries.

Prospective authors are invited to submit through EDAS (<http://bit.ly/2BwvPbV>). Affiliation of the FIRST or the CORRESPONDING author must be from industry. Each abstract and subsequent presentation must be within the scope and topics of I<sup>2</sup>MTC and should explain the significance of the technologies/methods/applications in the presentation, and contain a list of key references. Authors of accepted abstracts must register for the Conference and attend to give their presentations during the Industry Day event.

Accepted abstracts will appear in the conference program and in the proceedings distributed during the conference, but will not appear in IEEE Xplore. However, authors of Industry Presentations shared during I<sup>2</sup>MTC 2017 will be allowed to submit extended versions of their presentations as papers to the Special Issue of IEEE Transactions on Instrumentation & Measurement on I<sup>2</sup>MTC 2018, to be published in 2019.

#### Chairs:

Kristi Paranjape

Kristi.Paranjape@ni.com

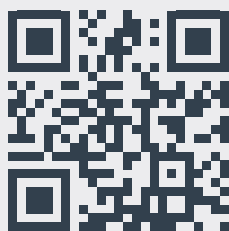

Eric Stover

Eric.Stover@cdicorp.com

Submission of abstracts is allowed continuously through March 1, 2018.

Notification of presentation acceptance will be given soon after the submitted abstract is reviewed to facilitate registration process.
